

ELECTRICITÉ DU CAMBODGE

DEPARTMENT OF RURAL ELECTRIFICATION FUND

Report on Transferring the Real Benefits to the Rural Population for the Year 2023

COMPILED BY THE DEPARTMENT OF RURAL ELECTRIFICATION FUND 2024

**Message from Royal Government *of* Cambodia
Delegate *in* Charge *as* Managing Director *of*
Electricité du Cambodge (EDC)**

Message from Royal Government of Cambodia Delegate in Charge as Managing Director of Electricité du Cambodge (EDC)

Electricity is one of the most essential necessities for humanity. As modern technology advances, and consumption rises, our dependence on it increases, improving the quality of life.

In 1998, our country, Cambodia, achieved complete peace nationwide, thanks to the win-win policy of Samdech Techo. The electricity sector, as well as other sectors, began to develop extensively. The Rural Electrification Fund began its initial operations in 2004. The price of electricity in rural areas was much higher compared to those in Phnom Penh, especially in some remote areas such as islands, resulting in a low electrification rate nationwide. In 2008, only 17% of households had access to electricity. Since 2016, our country has achieved nationwide electricity-tariff uniformity. Whether people live in rural areas or in urban areas, they can access electricity at reasonable prices, and the supply rate in 2024 is expected to increase to 95% from the national grid.

We are honoured to present the annual report of the Department of the Rural Electrification Fund of Electricité du Cambodge for the year 2023. In this report, the department received 474.25 billion Riels from Electricité du Cambodge to implement the tariff subsidy program and other programs which improve the quality of life for rural communities in Cambodia through enhanced access to electricity for more than 2 million households across the country especially in remote areas have been able to receive electricity at the same price. To improve electrification, the following programs have also been implemented:

- To support low-income families who cannot afford to buy equipment to connect and use electricity, the Rural Electrification Fund Department has donated electrical wiring from meters to homes, along with equipment such as light bulbs, circuit breakers, circuit breaker boxes, switches, and in-house electrical wiring to 1,848 families. This number has increased to 83,522 families since the program started.

- The Rural Electrification Fund Department has supplied solar home systems to families in areas where the grid cannot reach or is least efficient, such as floating villages in Tonle Sap Lake, islands, and remote areas. This donation includes 1,037 units of 500-watt solar home systems and 4-liter electric rice cookers, along with 685 units of 50-watt solar home systems. The total number of solar home systems provided to rural households since the program began is 119,894.

- The electricity infrastructure has been improved by 28 rural electricity enterprises that have improved their grid system, spanning a total length of MV and LV of 553.45 kilometers. This has led to a more efficient and reliable distribution of electricity to 6,665 households.

- Agricultural sector consumers receive preferential electricity prices of 480 Riel per kilowatt-hour from 9 pm to 7 am. This initiative added 95 new consumers, an increase of 1,263 consumers since the program was created.

These achievements have been made possible by the strategical support of the Royal Government led by **Samdech Akka Moha Sena Padei Techo HUN SEN**, **Samdech Moha Borvor Thipadei HUN MANET**, through the Ministry of Mines and Energy, the Ministry of Economy and Finance as the subordinates, the Electricity Authority of Cambodia, rural electricity enterprises, development partners, and the efforts of all our employees and as a managing director of Electricité Du

Cambodge, I would like to thank deeply. Electricité Du Cambodge will continue to support this vision and mission to ensure stable and sustainable electricity supply from the national grid at the maximum to all families, regardless of where they live in Cambodia.

Dr. Praing Chulasa
Royal Government of Cambodia Delegate
in charge as Managing Director *Pa E*

Progress, Achievements *and* Analysis of REF Programs

1.1 Power to the Poor (P2P) Program

REF continued its efforts to enhance rural access to electricity through the P2P Program, which involves providing electrical materials as donations to rural households (HH) to facilitate their connection to the power grid. In 2022, REF implemented 6 contracts with 6 licensees to supply these materials. In 2023, REF signed 12 additional contracts with 11 licensees.

In total, 18 contracts with 14 licensees aimed to connect 3,255 rural HH across Cambodia. Funding was provided by Electricité du Cambodge (EDC) for 17 contracts with a target of 3,105 HHs, and KfW for one tract targeting 150 HHs. By the end of 2023, 1,848 HHs were successfully connected, with 1,698 HHs funded by EDC and 150 HHs funded by KfW.

Out of the 18 contracts above, 12 achieved their targets by the end of 2023 contract period. The remaining 6 contracts will continue in 2024.

Table 1: Province-wise Target and Connected Rural Households (2022-2023), under P2P Program, Funded By EDC and KfW

| No. | Province | Contracted target number of rural HH to be connected, (HH) | | Number of rural HH connected, (HH) |
|-------------------|--------------|--|-------|------------------------------------|
| | | 2022 | 2023 | |
| I. Funded by EDC | | | | |
| 1 | Battambang | - | 72 | 72 |
| 2 | Kampong Thom | 435 | 564 | 735 |
| 3 | Kandal | - | 84 | 84 |
| 4 | Kratie | - | 300 | - |
| 5 | Preah Vihear | - | 150 | - |
| 6 | Pursat | - | 467 | 17 |
| 7 | Rattanakiri | 127 | - | 127 |
| 8 | Siem Reap | 220 | 87 | 307 |
| 9 | Takeo | 300 | 56 | 356 |
| Total I | | 1,082 | 2,023 | 1,698 |
| II. Funded by KfW | | | | |
| 1 | Kampong Thom | 150 | - | 150 |
| Total II | | 150 | - | 150 |
| Total I+II | | 1,232 | 2,023 | 1,848 |
| | | 3,255 | | |

Approximately 8,500 people directly benefitted from this program in 2023¹.

The P2P Program, through the donation of electrical materials, has significantly boosted rural HHs' access to electricity.

¹ Number based on the average rural household size of 4.6 people (according to the Cambodia Inter-Censal Population Survey 2013).

Table 2: Province-wise Villages Covered by the P2P Program Funded by EDC and KfW, 2023

| No. | Province | Total number of villages (Census) | Number of villages covered | |
|--------------------|--------------|-----------------------------------|----------------------------|----------------|
| | | | Funding by EDC | Funding by KfW |
| 1 | Battambang | 805 | 7 | - |
| 2 | Kampong Thom | 742 | 31 | 23 |
| 3 | Kampot | 488 | 10 | - |
| 4 | Kandal | 918 | 12 | - |
| 5 | Pursat | 510 | 1 | - |
| 6 | Rattanakiri | 243 | 15 | - |
| 7 | Siem Reap | 930 | 20 | - |
| 8 | Takeo | 1,119 | 72 | - |
| | Total | 4,637 | 168 | 23 |
| Grand Total | | | 191 | |

Detailed information on contracted targets, the number of connections per province, and village coverage is provided in the annexes:

- **Annex 4** lists the licensees involved.
- **Annex 5** summarises contracted and connected HHs by funding source.
- **Annex 6** lists the covered villages.
- **Annex 7** provides a provincial map of the program's implementation.

To ensure transparency, REF staff conducted site inspections, verifying new connections in each participating province

Mr. Vong Sombo having license No. 281 for Providing Electricity Service at Pra Maoy and Anlong Reab Commune, Veal Veng District, Pursat Province

1.2 Solar Home System (SHS) Program

The Solar Home System (SHS) Program targets remote rural households that may not have access to the electricity network for an extended period, providing them with SHS units as grants.

To implement this program, REF uses two services providers: one for supplying the SHS materials and another for transportation and installation of SHS.

Progress and achievements for 2023 are outlined below:

1. **SHS-500Wp with 4L Panasonic AC Rice Cooker and SHS-50Wp:** REF installed 1,037 units of SHS-500Wp including a 4L Panasonic AC Rice Cooker, donated to rural HHs funded by EDC. An additional, 1,801 remain in EDC's warehouse for installation in 2024.
2. **SHS-50Wp:** 685 units were installed as donations to rural HHs, funded by KfW.
3. **3.5kW Solar System:** REF installed a 3.5kW solar system at the headquarters for anti-fishing crime activities in Ek Phnom district, Battambang, donated under EDC funding.
4. **100W Solar Street Lighting:** 170 units of solar street lighting were installed as public lighting for Battambang Provincial Administration, funded by EDC.
5. **100W Solar Lighting for Frontline Headquarters:** 16 units of solar lighting were installed at frontline headquarters in Preah Sihanouk province, funded by EDC.
6. **Solar Batteries:** 4 solar batteries were provided to the Children's Dream House Center in Pursat province, funded by EDC.
7. **80W Solar Lighting for Intervention Brigade 14:** 6 units of solar lighting were installed for the intervention brigade 14 in Pursat province funded by EDC.
8. **3.56kW Solar Pumping System:** REF installed a 3.5kW solar pumping system, including pump motors, water pipes and water storage tanks for troops stationed along the along the Cambodian-Thai border in Odor Meanchey province funded by EDC.

Table 3: Province-wise SHS Installations by EDC and KfW in 2023

| No. | Province | Number of SHS installed |
|--|----------------|-------------------------|
| A. Funded by Electricité du Cambodge (EDC) | | |
| 1 | Battambang | 171 |
| 2 | Pursat | 1,047 |
| 3 | Preah Sihanouk | 16 |
| 4 | Otdar Meanchey | 3 |
| Total A | | 1,237 |
| B. Funded by Kreditanstalt für Wiederaufbau (KfW) | | |
| 1 | Pursat | 685 |
| Total B | | 685 |
| Total A+B | | 1,922 |

A total of 1,922 rural HHs received SHS units, benefitting approximately 8,841 people².

² Number based on the average rural household size of 4.6 people (according to the Cambodia Inter-Censal Population Survey 2013).

Table 4: Province-wise villages with SHS, funded by EDC And KfW, 2023

| No. | Province | Total Number of Villages (Census) | Number of villages were installed SHS | |
|--------------|----------------|-----------------------------------|---------------------------------------|---------------|
| | | | Funded by EDC | Funded by KfW |
| 1 | Battambang | 805 | 4 | - |
| 2 | Pursat | 510 | 29 | 3 |
| 3 | Preah Sihanouk | 115 | 1 | - |
| 4 | Otdar Meanchey | 260 | 1 | - |
| Total | | 1,690 | 35 | 3 |

Detailed information on the solar installations and coverage by province in the annexes:

- **Annex 8** lists the villages where solar systems were installed in 2023
- **Annex 9** includes a map of the province with SHS installations.

1.3 Program for Improving and Developing Electricity Infrastructure in Rural Areas

In 2023, REF executed 31 contracts with 31 licensees to improve and develop electricity infrastructure in rural areas. These contracts were funded by EDC for 15 licensees and, KfW for 16 licensees. Of the contracts, 29 achieved 100% of their targets within the contract period, while the remaining 2 contracts will continue into 2024.

Table 5: Summary of Network Length by Province, Funded by EDC and KfW, 2023

| No. | Province/City | Contracted target length of network, (km) | | Constructed length of network, (km) | |
|---|------------------|---|---------------------|-------------------------------------|---------------------|

| 11 | Prey Veng | 1.137 | - | 6 |
| 12 | Pursat | 510 | 32 | 6 |
| 13 | Ratanak Kiri | 243 | 6 | - |
| 14 | Siem Reap | 930 | 10 | 6 |
| 15 | Svay Rieng | 690 | - | 14 |
| 16 | Takeo | 1.119 | 15 | - |
| 17 | Tboung Khmum | 853 | 6 | - |
| Total | | 11,626 | 121 | 69 |
| Grant total | | | 190 | |

Detailed information on the infrastructure improvements and village electrification in the annexes:

- **Annex 10** lists the licensees involved in the the program, funded by EDC and KfW, for developing rural electricity infrastructure in 2023.
- **Annex 11** summarises the contracted and constructed network length, and current status.
- **Annex 12** lists the villages that were electrified.
- **Annex 13** includes a map of the provinces that received infrastructure assistance, funded by EDC and KfW in 2023.

To ensure transparency, REF staff verified network construction by all licensees in the program. Images of the verification activities are shown below.

**Akisni Beungkatout Co., LTD (License No. 501L) for Provides
Electricity Services in parts of Krakor District and Kanchor Commune,
Kandiang District, Pursat Province**

1.4 Program for Subsidising Licensees to Reduce Electricity Tariffs (2015-2023)

In 2023, REF provided subsidies to licensees to support tariff reduction for electricity sales in rural areas and local. Key details include:

1. 325 licensees throughout Cambodia received subsidies to lower tariffs.
2. 65 licensees were subsidised specifically for supplying electricity to market areas.

Detailed information on the subsidy program is provided in the annexes:

- **Annex 14-17** summarise the number of customers, energy quantities and graphics of Energy Usage subsidized by REF in 2023 for the 2022 cycle
- **Annex 18-21** summarise the number of customers, energy quantities and graphics of Energy Usage subsidized by REF in 2023 for the 2023 cycle

1.5 Program for Special Preferential Night-time Rate for Agricultural Electricity Use

Since 2016, the Ministry of Mines and Energy (MME) has provided a special tariff of 480 Riels per kWh electricity consumption during night hours (9:00 p.m. to 7:00 a.m) to support agricultural activities. Initially focused on water pumping, this rate was expanded in 2021 to include all types of agricultural consumers. In 2023, the program continued offering this preferential rate for night-time electricity use from the national grid.

Table 7: Customers in EDC's Supply Area Receiving the Special Rate (480 Riels per kWh), 2023

| Year | Number of Customers Connected | |
|--------------|---|--------------------------|
| | Customers switch from different Categories to the Agricultural Category | New connection Customers |
| 2023 | 136 | 25 |
| Total | 161 | |

Table 8: Customers in Licensee Supply Areas Receiving the Special Rate (480 Riels per kWh), 2023

| Year | Number of Customers Connected | |
|--------------|---|--------------------------|
| | Customers switch from different Categories to the Agricultural Category | New connection Customers |
| 2023 | 845 | 157 |
| Total | 1,002 | |

This program significantly boosted the agricultural sector by enabling cost effective electricity use for activities such as animal husbandry, aquaculture irrigation, rice milling, canning, food and beverage processing, and animal feed manufacturing and more. Both rural households and agribusinesses benefitted from these reduced rates.

To ensure transparent and accurate application of the program, REF staff conducted verification activities for all participating licensees. Images below illustrate rEF's physical verification process.

**Vannalyhim Electricity Enterprise, Providing
Electric Power Service in Prasat Sambor District,
Kampong Thom Province**

To further support agricultural electricity use, Prepaid Time-of-Use (TOU) Metres were installed under licensee supply areas.

Table 9: Prepaid TOU Meters Installed in Licensee Supply Areas, 2023

| No. | Province | Prepaid TOU Meter (Set) | |
|--------------|-----------|-------------------------|-----------|
| | | Licensee applied | Installed |

| Total | | 1,137 | 9 |

The verification process is documented with images below.

**Chhor Veng Nguon Electricity Enterprise (No. 355L)
Providing Electric Power Service at Po Rieng, Pea Raing Districts, Prey Veng Province and
Lvea Em District, Kandal Province**

Detailed information on the program's impact and installations is provided in the annexes:

- **Annex 22** provides a province-wise summary of agricultural customers benefiting from the special rate in EDC's supply area in 2023.
- **Annex 23** offers province-wise details of customers benefiting from the special rate in licensee supply areas in 2023.
- **Annex 24** lists the summary of licensees and prepaid TOU Meters installed in licensee supply areas, 2023.

Annexes

Annex 1.

Policies and Development Strategies of Electrical Energy Sector

1.1 Policies of the Electrical Energy Sector of RGC

Electrical energy is a vital need for society and the economy. Electrical energy provides livelihoods to the people engaged in its generation and supply, and is also an essential product to drive development of various sectors of the nation. Therefore, developing the electrical energy sector is crucial to powering economic growth, developing other sectors, including the rural sector and improving the living standards of Cambodia's citizens. During the sixth mandate of the National Assembly, **the Royal Government of Cambodia (RGC)** has the ambition to manage and strengthen the development of the electrical energy sector in order to “reach and achieve the supply of sufficient, sustainable, reliable, quality and affordable electricity for all categories of consumers throughout the Kingdom of Cambodia.”

In the sixth mandate of the National Assembly within the framework of the fourth stage of Rectangular Strategies regarding the development of electrical energy sector, the Royal Government prioritizes:

- Priority 1 -** Continuing to reduce the electricity price for the consumers, expand coverage of the national electricity network system to cover the whole country, increase stability and quality of electricity supply (Rectangular Strategy 2 – Angle 1);
- Priority 2 -** Continuing to expand the connectivity of electricity networks with low electricity price to workers, employees, students at rented accommodations (Rectangular Strategy 3 – Angle 1);
- Priority 3 -** Continuing to strengthen the development of the rural areas to be vibrant by continuing to invest for the expansion of affordable, sustainable and quality electricity supply to rural areas (Rectangular Strategy 4 – Angle 1);
- Priority 4 -** Continuing to motivate and increase the investment on sources of clean energy and renewable energy, especially solar energy, while reducing the production of energy from unclean sources in order to ensure long-term energy security (Rectangular Strategy 4 – Angle 4).

1.2 Developmental Strategies

With the aim to “reach and achieve the supply of sufficient, sustainable, reliable, quality and affordable electrical energy for consumers of all types throughout the Kingdom of Cambodia,” the Ministry of Mines and Energy, an entity in charge of electricity sector of the Royal Government, has set out 9 points of strategies as follows:

1. Update the development of master plan of electricity sector in the Kingdom of Cambodia;
2. Continue the development of generation, transmission and distribution capacity of electricity to enable Cambodia to have sufficient electricity sources to meet the consumption demand, allow the supply of electricity from national networks to cover all parts of the country including rural areas, and allow distribution of electricity to cover every village countrywide. With the aim of reducing poverty, promoting the level of livelihood and boosting development of the economy of citizens in the rural areas during the sixth mandate of the National Assembly, the Royal Government of Cambodia will continue to strengthen the development at the rural areas to be vibrant by continuing to invest on expansion of coverage of affordable, sustainable and quality electricity to the rural areas countrywide;

3. Strengthen the connectivity of electricity supply to premises that require electricity, especially those residences that are yet to have electricity for consumption, both in the urban and rural areas, in order to achieve the target of making electricity available to 90% of households by 2023;
4. Improve the provision of electricity supply services with the aim of enabling sufficient, round the clock, quality, safe, reliable, affordable electricity supply and having proper metering in both urban and rural areas;
5. Prepare and implement the plan to reduce electricity prices as well as study the possibility of reducing electricity prices further, aiming to facilitate the citizen's livelihoods and promote investment in Cambodia;
6. Consolidate the mechanisms of the institutions to enable articulate and effective functioning of communications, roles, responsibilities, duties, hierarchies and independence amongst institutions and units in energy sector;
7. Attract private sectors to join in the investment with Electricite du Cambodge so that there are sufficient investments in the electricity businesses but maintaining the management of Electricite du Cambodge over national networks which are core to the entire business;
8. Use Rural Electrification Fund in cross-subsidy, reduction of price discrepancy and transfer of capital to help the development of remote rural areas in order to ensure equity in the access to electricity services between urban and rural areas;
9. Reduce the impact on natural and societal environment to a minimum by promoting the use of clean and sustainable energy sources to an extent that does not induce significant effect and join in the cooperation of the energy sector in regional and internal frameworks.

Annex 2.

Information on Rural Electrification Fund

2.1 Establishment of Rural Electrification Fund (REF)

REF was first established by the Royal Decree No. NS/RKT/1204/048 on 4th December 2004 to accelerate the development of rural electrification. In the initial year, REF utilized the funds provided by the World Bank under the Rural Electrification and Transmission Project (RETP) and RGC's counterpart fund. After RETP was closed on 31st January 2012 and funds were not made available to meet the operation expenses of REF. On 22nd August 2012, a new Royal Decree No. NS/RKT/0812/734 amended some articles of the old Royal Decree on formation of REF, to integrate REF with Electricité du Cambodge (EDC) so that REF can continue to perform its work independently with Cambodian funding, grant and donations from external funding to assist in development of rural electrification in Cambodia. In accordance with this new Royal Decree, EDC has established a new department³ known as **“Department of Rural Electrification Fund (REF)”**.

This represents a significant initiative by the RGC to motivate and attract private sector investment in rural electrical infrastructure. The aim is to expedite the development of electricity in these areas, enabling greater numbers of rural poor to access electricity for various purposes, including lighting, commercial activities, and handicrafts. This access is expected to enhance their standard of living and contribute to the broader societal good.

2.2 Organization Structure

REF operates in accordance with the Statute of EDC and functions as a non-profit organization and has a separate account.

2.3 Library

REF also maintains a library for the public, providing resources to understand REF's activities, reports, and the development of rural electrification in the Kingdom of Cambodia.

³ Decision No. 0898 dated September 12, 2012 on the integration of REF institution in the management structure and organization of EDC.

2.4 The Sources of Funding

The sources of funding for REF⁴ are as follows:

1. Social budget package included in the electricity tariff of EDC and other donations of EDC, if any.
2. Donations and grants approved by Ministry of Mines and Energy (MME) and the Ministry of Economy and Finance (MEF).
3. Other sources from RGC.

2.5 REF's Funding and the Use of Fund

During 2023, REF received funds of KHR 474.25 billion from EDC for extending the benefits of electrification to the population in rural areas. The fund provided by EDC is also for the operation of REF.

REF used the fund for the implementation of the following programs:

1. Power to the Poor (P2P) Program,
2. Solar Home System (SHS) Program,
3. Program for Improving and Developing Electricity Infrastructure in Rural Areas,
4. Program for Subsidising Licensees to Reduce Electricity Tariffs
5. Program for Special Preferential Night-time Rate for Agricultural Electricity Use

⁴ Royal Decree No. NS/RKT/0812/734 dated August 22, 2012 on amendment of Article 2, Article 5, and Article 7 of the Royal Decree No. NS/RKT/1204/048 dated December 4, 2004 on the Establishment of REF, and Article 4 new of the Royal Decree No. NS/RKT/0108/064 dated January 28, 2008 on Revision of Article 4 of the Royal Decree No. NS/RKT/1204/048 dated December 4, 2004 on the Establishment of REF.

Annex 3

Information on Objectives, Mission and Program Criteria for Transferring the Real Benefits to the Rural Population

3.1 Objectives

The objectives of REF are as follows⁵:

1. To promote equitable rural electrification coverage by facilitating the population's access to electricity at affordable prices for economic, social and household uses, thus contributing to poverty reduction.
2. To promote and encourage the private sector to participate in providing sustainable rural electrification services, in particular, the exploitation and economic application of technically and commercially well-proven new and renewable energy technologies.

3.2 Missions

REF has the following missions:

1. Promoting equitable rural electrification coverage by facilitating the population's access to electricity at affordable prices for economic, social and household uses.
2. Providing support for the preparation and implementation of rural electrification projects.
3. Promoting and facilitating access to grid electricity for poor households in rural areas by providing interest-free loans, subsidies, and electrical materials as grants, enabling them to connect their homes to the electricity supply.
4. Promoting and facilitating access to electricity for remote rural households, which may not have network access for a long period, through Solar Home Systems.
5. Promoting and facilitating private electricity suppliers in rural areas with legal licenses to access funds for investing in the expansion of electricity supply infrastructure, to fully cover their authorized distribution areas, allowing all rural households to have access to electricity.
6. Providing subsidies, under the framework of Strategic Planning for Reducing the Rate and Gap of the tariff for the sale of the electricity in the Kingdom of Cambodia from 2015 to 2023 in provinces and cities, to licensees connected to the grid system for reducing tariffs for the sale of electricity in rural areas.
7. Promoting and facilitating all types of consumers in the agricultural sector by providing a special preferential rate of 480 riel per kWh electricity used during night time from 9:00 p.m. to 7:00 a.m. sourced from the national grid and normal rate per kWh for use of electricity for all types of consumers in agricultural sector during day time from 7:00 a.m. to 9:00 p.m.
8. Promoting the use of well-proven, technically and commercially viable new and renewable energy technologies.

REF will use its resources to achieve the above missions depending on the conditions for which funds are made available by different sources.

3.3 Programs for Transferring the Real Benefits to the Rural Population

In 2023, REF implemented the following programs:

⁵ Provision 3 of the Royal Decree No. NS/RKT/1204/048 dated 4 December 2004 on the establishment of REF.

3.3.1 Power to the Poor (P2P) Program and Criteria

The purpose of this program is to facilitate the poor households in rural areas to have access to electricity from the grid by providing donated electrical equipment, to connect electricity to the house.

REF donates electrical materials for the house wiring and electricity service line from the meter box to the house. The beneficiary is responsible for paying (i) the amount of money for the connection fee and deposit fee for use of electricity.

Criterion for implementing the program is as follows:

A. Criteria for REEs

Criterion for REEs are as follows:

1. Have a license from EAC for providing electric power.
2. Area of supply in rural areas have a power supply from the national grid.
3. Agree to install in-house wiring as follows:
 - 15 metres of PVC copper cable 2x1.5mm².
 - 1 Main Circuit Breaker (MCB), 2 poles, 10A include Circuit Breaker, Box.
 - 3 Switches and outlet sockets, 10A.
 - 3 Bulbs Butt.
 - 3 Energy efficient light bulbs (LED): min 11W.
4. Agree to install service line of size 2x16 mm² with the length of 80m or longer or shorter as requirement from the connection point (meter on the pole) to the beneficiary's house as agreed by licensee and beneficiary.
5. Ensure that all electrical materials for the connection is as provided by the REF.
6. Agree to execute contract between REF and REE to install electrical materials provided by REF and to connect electricity to home of, beneficiaries .

B. Criteria for Poor Household (Eligible beneficiary)

Criteria for Poor Household (HH) are as follows:

1. HH not yet connected to the supply system.
2. Living in the existing electrified rural areas.
3. Have a stable house for safety of electrification.
4. Agree to provide wooden poles of minimum 4-5 metres height erected with a span of maximum length of 20-30 metres.
5. Agree to sign or thumbprint the document to confirm the receipt of electrical materials listed therein for electricity connection under the Power to the Poor Program.

3.3.2 Solar Home System (SHS) Program

This program targets remote rural households that may not have access to the electricity network for an extended period, providing them with SHS as grants.

3.3.3 Program for Improving and Developing Electricity Infrastructure in Rural Areas and Criteria

The purpose of this program is to facilitate private electricity suppliers in rural areas with legal licenses to access funds for investing in the expansion of electricity supply infrastructure, ensuring full coverage of their authorized distribution areas and allowing all rural households in the these areas to have access electricity.

The criteria for implementation of this program is formulated for three different types of area considering the density of population as follows:

Area No. 1: Densely populated area with high economic efficiency

REF will provide the guarantee on loans borrowed by the licensee in rural areas from the local banks for investment on development of electricity infrastructure in rural areas to fully cover its authorized distribution area.

Criteria for area No. 1 is as follows:

1. The licensee shall have valid license for providing electricity service issued by EAC and the term of the license shall be for at least 5 years from the date of application for loan.
2. The licensee shall have proper accounting record of its electricity business.
3. The loan from a bank, also known as “bank loan”, will be only for investment in electricity supply infrastructure in rural areas within its authorized licensed area and getting supply from the national grid.
4. To ensure that the licensee repays the loan amount and the interest on the loan to the bank, for which REF has provided a guarantee, the licensee must sign and fingerprint, and provide it to REF in advance. This agreement states that in case of non-payment of the loan and/or interest, their license, along with the property contained within it, will be transferred to a new licensee or EDC as decided by REF. This provision allows REF to take action if the licensee fails to repay the bank loan, including the interest.
5. The licensee shall obtain no-objection from EAC on the conditions of transfer of license to EDC in case the borrower fails to pay back on time as agreed with the bank, in the guarantee contract for loan which the licensee shall execute with EDC.

Area No. 2: Area with medium density of population, where doing electricity business may not be profitable if the licensee has to pay interest on the investment capital

For Area No. 2, which is a medium density electricity consumption area, the electricity supply business may not be profitable if the licensee has to pay interest on the investment capital. REF can provide interest-free loans to licensees who are supplying electricity in this area No. 2 to invest in the development of electricity supply infrastructure in their authorized license area. This provision to provide REF’s fund has 2 goals: (i)- to promote the expansion and improvement of medium and/or low voltage electric power supply in rural areas and (ii)- to encourage the production of local electrical equipment and appliances.

Criteria for area No. 2 is as follows:

1. The licensee shall have valid license for providing electricity service issued by EAC and the term of the license shall be for at least 5 years from the date of application for loan.

2. The licensee shall have proper accounting record of its electricity business.
3. This interest free loan is for investment on construction of electricity infrastructure in rural areas connected from the grid only.
4. The licensee can use this interest free loan for investment on MV and LV electricity supply infrastructure in its authorized licensed area, both for the development of new electricity infrastructure and for improving the existing electricity infrastructure.
5. The licensee applies for interest free loans from REF with (i) - a detailed of the project development plan, (ii) - an estimated cost of electricity materials for the project development, (iii) - the copies of the license with all revisions, (iv) - an accounting record of its electricity business, costing of existing infrastructures, (v) - the letter address to EAC seeking no-objection of EAC to transfer the licensed business to EDC in case of failure to repay the installment as provided in the contract between REF and licensee, and (vi) - any other documents required by REF to examine the proposal.
6. REF examines the application and checks the total cost of the proposed project based on the rate of each infrastructure in the project submitted by the applicant. In case REF finds that the cost of any infrastructure in the proposed project exceeds the rate used by the EAC for the calculation of costs in the year requested, REF can adjust and reduce the total cost of the project. After determining the total cost of the project, REF will approve the amount of interest-free loan that REF can provide to the applicants and sign a contract for payment and repayment in consultation with EAC. The amount of interest free loan shall not exceed \$300,000 (three hundred thousand) per project. The licensee is required to contribute at least 20% of the project cost. REF shall obtain no-objection from EAC on the conditions of transfer of license to EDC in case the borrower fails to pay back on time as agreed with REF, in the contract for interest free loan.
7. The licensee shall apply to REF for disbursement of interest free loan along with progress report. REF verifies the progress and makes disbursements in installment depending on the work progress. REF will acknowledge the repayment of the full amount of the interest free loan when the full amount of interest free loan is repaid back in installment by the licensee.
8. The amount of the interest free loan will not exceed \$300,000 per project. The licensee may request for other new project for consideration of REF when required.
9. The repayment period shall not exceed 8 years or the validity of license on the date of application for assistance whichever is earlier.
10. In the case of loans for the development of new electricity infrastructure and the improvement of existing electricity infrastructure, the medium voltage infrastructure must be checked and agreed by the Department of Project Implementation and Planning of EDC to avoid any overlapping of the development plan of EDC
11. As the budget of REF, which provides an interest free loan to the licensees from the fund, aims to promote the expansion and improvement of electricity supply in rural areas and encourages the local electricity and equipment industry, therefore, applicants for this interest free loan must help by using, as much as possible, locally produced electrical equipment, to support Cambodia's local electrical equipment industry. For materials and equipment that are required in the supply of electricity, the applicant is obliged to use electrical materials and equipment from the local factory recognized by EDC. This obligation holds unless the quality of the electrical materials and equipment recognized and recommended is lower than the standard in force in Cambodia and/or the selling price of the electrical materials and equipment that EDC has recognized and instruct the licensee to use more than the cost set by the EAC in calculating the actual service cost of the licensee in the year in which the project is to be implemented. If the licensee fails to use the electrical materials and equipment from the electrical materials and equipment factory which EDC has declared and recommended to use the above,

REF has the right not to provide an interest free loan equal to the cost of materials and equipment that the licensee should have used as stated above. If there is a disagreement between the REF and the applicant regarding the quality and price of the electrical materials and equipment which EDC has recognized and recommend for use to the licensee, the decision of the EAC as an arbitrator shall be final.

12. In the case of existing licensee, the amount of the interest free loan will not exceed 75% of the cost of the existing electricity infrastructure of the licensee as assessed by EAC. In the case of new licensee, the amount of the interest free loan will not exceed 75% of the cost of the proposed electricity infrastructure of the licensee as assessed by EAC.
13. The licensee shall agree to execute the contract and other legal documents with REF.
14. Source of funds is from EDC and KfW.

Area No. 3: Area with low density of population, where doing electricity business is not viable unless part of the infrastructure cost is provided as grant

For Area No. 3, which is a low density electricity consumption area, the electricity supply business may not be profitable, unless there is a partial subsidy on electricity infrastructure investment. REF can provide interest free loans plus subsidies (grants) to licensees who are supplying electricity in this area No. 3 to invest in the development of electricity supply infrastructure in their authorized license area. The provision of REF's fund as stated above has 2 goals: (i)- to promote the expansion and improvement of medium and/or low voltage electric power supplies in rural areas and (ii)- to encourage the production of local electrical equipment and appliances.

Criteria for area No. 3 is as follows:

1. The licensee shall have a valid license for providing electricity service issued by EAC and the term of the license shall be for at least 5 years from the date of application for loan.
2. The licensee shall have proper accounting record of its electricity business.
3. This interest free loan plus subsidies (grants) is for investment on construction of electricity infrastructure in rural areas connected from the grid only and which is evaluated by REF as area eligible for grant.
4. The licensee can use this interest free loan plus subsidies (grants) for investment on MV and LV electricity supply infrastructure in its authorized licensed area, both for the development of new electricity infrastructure and for improving the existing electricity infrastructure.
5. The licensee applies for interest free loan plus subsidies (grants) from REF with (i) - a detailed of the project development plan, (ii) - an estimated cost of electricity materials for the project development, (iii) - the copies of the license with all revisions, (iv) - an accounting record of its electricity business, costing of existing infrastructures, (v) - the letter address to EAC seeking no-objection of EAC to transfer the licensed business to EDC in case of failure to repay the installment as provided in the contract between REF and licensee, and (vi) - any other documents required by REF to examine the proposal.
6. REF examines the application and checks the total cost of the proposed project based on the rate of each infrastructure in the project submitted by the applicant. In case REF finds that the cost of any infrastructure in the proposed project exceeds the rate used by the EAC for the calculation of costs in the year requested, REF can adjust and reduce the total cost of the project. After determining the total cost of the project, REF will approve the amount of interest-free loan that REF can provide to the applicants and sign a contract for payment and repayment in consultation with EAC. The amount

of interest free loan shall not exceed \$300,000 (three hundred thousand) per project. The licensee is required to contribute at least 20% of the project cost. REF shall obtain no-objection from EAC on the conditions of transfer of license to EDC in case the borrower fails to pay back on time as agreed with REF, in the contract for interest free loan plus subsidies (grants).

7. The licensee shall apply to REF for disbursement of interest free loan plus subsidies (grants) along with progress report. REF verifies the work progress and makes disbursements in installment depending on the work progress. REF will acknowledge the repayment of the full amount of the interest free loan plus subsidies (grants) when the full amount of interest free loan is repaid back by the licensee. The amount, provided as grant in this budget assistance by REF, is not required to be paid back.
8. The amount of the interest free loan will not exceed \$300,000 per project. The licensee may request for other new project for consideration of REF when required.
9. The repayment period shall not exceed 8 years or the validity of license on the date of application for assistance whichever is earlier.
10. In the case of loans for the development of new electricity infrastructure and the improvement of existing electricity infrastructure, the medium voltage must be confirmed by the Department of Project Implementation and Planning of EDC to avoid overlapping the development plan of EDC.
11. As the budget of REF, which provides an interest free loan plus subsidies (grants) to the licensees from the fund, aims to promote the expansion and improvement of electricity supply in rural areas and encourages the local electricity and equipment industry, therefore, applicants for this interest free loan must help by using, as much as possible, locally produced electrical equipment, to support Cambodia's local electrical equipment industry. For materials and equipment that are required in the supply of electricity, the applicant is obliged to use electrical materials and equipment from the local factory recognized by EDC. This obligation holds unless the quality of the electrical materials and equipment that EDC declares to be recognized and recommended to be used by the licensees is lower than the standard in force in Cambodia and/or the selling price of the electrical materials and equipment that EDC has recognized and instruct the licensee to use more than the cost set by the EAC in calculating the actual service cost of the licensee in the year in which the project is to be implemented. If the licensee fails to use the electrical materials and equipment from the electrical materials and equipment factory which EDC has declared and recommended to use the above, REF has the right not to provide an interest free loan equal to the cost of materials and equipment that the licensee should have used as stated above. If there is a disagreement between the REF and the applicant regarding the quality and price of the electrical materials and equipment which EDC has recognized and recommend for use to the licensee, the decision of the EAC as an arbitrator shall be final.
12. In the case of existing licensee, the amount of the grant will not exceed 30% of the cost of the project and the amount of the interest free assistance will not exceed 75% of the cost of the existing electricity infrastructure of the licensee as assessed by EAC. In the case of new licensee, the amount of the grant will not exceed 30% of the price of the project and the amount of the interest free assistance will not exceed 75% of the cost of the proposed electricity infrastructure of the licensee as assessed by EAC.
13. The licensee shall agree to execute the contract and other legal documents with REF.
14. Source of funds is from EDC and KfW.

3.3.4 Program for Subsidising Licensees to Reduce Electricity Tariffs and Criteria

The purpose of this program is to provide subsidies to licensees connected to the grid system. This subsidy aims to reduce electricity tariffs for sales in rural areas. It is part of the framework of strategic planning to lower electricity tariffs across the Kingdom of Cambodia from 2015 to 2023 in provinces and cities.

The program is applicable for grid supply only and the criterion is as per decision of EAC⁶ from time to time.

3.3.5 Program for Special Preferential Night-time Rate for Agricultural Electricity Use and Criteria

The purpose of this program is to facilitate all types of consumers in the agricultural sector by providing a special preferential rate of 480 riel per kWh for electricity during night time from 9:00 p.m. to 7:00 a.m. for electricity sourced from the national grid. The normal rate per kWh will apply during day time from 7:00 a.m. to 9:00 p.m.

The program is applicable for all types of consumers in agricultural sector in the power supply area sourced from the national grid only. This criteria is in accordance with the EAC's instructions on the principles and procedures of applying the special preferential⁷ and the principles of EDC/REF on basic documents for the provision of a special preference tariff of 480 Riels per kWh for agricultural customers for the energy used from 9:00 p.m. to 7:00 a.m.⁸.

⁶ Decesion between EDC and EAC No. 011.16EAC dated February 26, 2016) on the determination of Procedure for Providing Subsidy for Reduction in Rate and Gap of the Tariff for sale of the electricity.

⁷ instruction of the EAC no. 130/22EAC dated November 30, 2022 on the principles and procedures of applying the special preferential rate of 480 Riels per kWh for night use from 9:00 p.m. to 7:00 a.m. for all types of users in agricultural sector in the area of electricity supply sourced from the national grid.

⁸ Principles of EDC/REF no. 0535/23REF dated February 22, 2023 on basic documents for the provision of a special preference tariff of 480 Riels per kWh for agricultural customers for the energy used from 9:00 p.m. to 7:00 a.m.

Annex 4

Province-wise Summary of EDC-Funded Licensees Providing Electrical Materials for Rural Household Connections under P2P Program, 2023

| Province | Service Area | License No. | Name of Licensee | Source of Supply |
|--------------|--|-------------|---|-----------------------|
| Battambang | Koas Krala District | 404L | Mr. Heng Chanthavy* | EDC |
